Self-Care Skills Correlated with Improved Education, Employment, and Independent Living Outcomes

What is the level of evidence?

This predictor of post-school success has been labeled by NTACT at a Research Based level of evidence regarding independent living skills, based on two a priori correlational studies and a Promising level of evidence regarding education and employment skills, based on one a priori correlational study and three exploratory correlational studies. More information on NTACT’s process for identifying effective practices is available here: NTACT’s Effective Practices.

What is the predictor?

Self-care/independent living skills are skills necessary for management of one’s personal self-care and daily independent living, including the personal management skills needed to interact with others, daily living skills, financial management skills, and the self-management of healthcare/wellness needs.

What are the essential characteristics?

1. Provide instruction, as needed based on assessment data, in (1) financial planning, (2) self-help, (3) cooking, (4) housekeeping, (5) home maintenance, (6) using transportation, (7) clothing care, (8) accessing community services, (9) time/organizational management, (10) self-determination, (11) social roles/citizenship, (12) community/peer relationships, or (10) critical thinking and problem solving.
2. Embed self-care/independent living skills instruction into academic coursework to help students connect academic skills to post-school goals.
3. Provide instruction in self-care independent living skills in multiple settings including general education, special education, and community.
4. Provide individual, small group, or whole class instruction in independent living and self-care skills, as appropriate.
5. Provide students multiple opportunities to practice independent living skills throughout the school day in real-life situations using real-life materials and equipment.

**Independent living skills may include skills for functioning in an environment that requires interaction with people from different CLD backgrounds.**

6. Provide transition services (e.g., completing housing application, obtaining Social Security Disability) for students to accomplish postsecondary independent living goals.
7. Conduct ongoing assessment of self-care/independent living skills to identify and evaluate levels of skill attainment, maintenance, and generalized use of skills in other settings where use of skills are required.
8. Teach home and community recreation skills that can be done alone or with others in both organized and informal settings.

**Where is the best place to find out how to do this practice?**

Additionally, there are numerous Practice Descriptions and corresponding Lesson Plan Starters for teaching specific self-care and independent living skills at www.TransitionTA.org under Transition Planning and Effective Practices for Independent Living.
