Using Acquired Brain Injury (ABI) Program to Increase Opportunities for Competitive, Integrated Employment for Students and Youth with Disabilities

What is the level of evidence?

This practice was identified by Rehabilitation Research & Training Center for Evidence-Based Practice in Vocational Rehabilitation (RRTC -EBP VR), and has been labeled by NTACT as a Promising Practice. More information on NTACT’s process for identifying effective practices is available here: NTACT’s Effective Practices.

What is the practice?

The Acquired Brain Injury (ABI) Program is a post-employment supported employment program that has been designed to facilitate employment for individuals with acquired brain injury. The result of several providers and professions, the ABI has resulted in ABI participants retaining employment for longer periods, and who are less likely to return for services through opening a new case.

Where is the best place to find out how to do this practice?

The Special Issue from the Journal of Vocational Rehabilitation is available through the website of the RRTC-EBP-VR here: 

You may also correspond with the RRTC-EBP-VR http://research2vrpractice.org/contact/ to request more detailed information from the original author regarding implementation of this practice.
